

## One Year From Now, You Will Wish You Had Your Wealth Plan TODAY.

### What does it mean to be Wealthy?

Wealth. You don't have to be born into it.

Wealth. You don't need a special degree to attain it.

Wealth. You don't need movie star looks to produce it.

### What do you need?

A Wealth Plan, a strategic, comprehensive focus designing the life and the wealth that you deserve. A good wealth plan includes practical, tactical action and integrated accountability. You will need to start from wherever you are today. Wealth building is a learned skill and a life long practice. Make a decision to become a student, then a professional, then a master in wealth building. Make that decision, and start today.

Wealth is within your reach, beginning today, because today you are about to learn to Live Out Loud.

### **To Live Out Loud means to be in the conversation about money.**

What does that mean? That means that you are going to be vocal about your vision, plans, and wealth building strategies. Why? Because living out loud leads to believing, planning, building and attaining the life you want. **You create a self-fulfilling prophecy.**

In order to build wealth, you need to create in your own mind what this means to you. It has to be about what you want – it's not something that someone else can or should force-feed you. No one can define it for you – it has to come from within. You need an idea of your desired destination, so you can create a plan to get there.

### **Do you know where to start?**

Are you playing an inner game, or an outer game? Is your current obstacle mental or tactical? Do you have a vision? The ability to see what you want, before you get it? Do you have a baseline strategy? A place to start and a destination in mind?

When it comes to developing your option of building wealth, we guide you on the road to that destination. (xx) offers step-by-step wealth planning that's tailored to your specific needs.

You could wander around on your own, hoping you'll eventually hit the mark, but the odds of success will be greatly reduced. If you build a proper team, you have raised your odds of success dramatically because **Wealth Building is a Team Sport**.

At (xx), we've worked with entrepreneurs, with people who feel challenged by their current circumstances and had no knowledge or direction, those who had almost achieved their financial goals but couldn't quite get there, and people who decided to boldly say, "Why not me?"

In other words, we work with everyday people who are going about their lives, but have decided to broaden their vision and embrace a bigger picture. Everyone must start at whatever point they are in their lives, and implement a plan to build a grander future.

Let's take a look at where you are today and discuss our step-by-step strategies.

#### **STEP ONE: PSYCHOLOGY OF WEALTH**

##### **1. Are you playing an inner game, working on the mental picture?**

Do you consider yourself financially literate? Have you begun on the path toward wealth, or are you debating whether or not to even try? Do you know your net worth? Are you financially burdened? Do you understand the concept of building wealth?

If your answer is no, or not completely, then you should start with the basics. You need to establish your baseline and the fundamentals and work on your mental preparedness. Your foundational knowledge and attitude are key to your success. Our product line of Wealth Building tools is a great place to start to get you moving in the wealth building direction.

## **STEP TWO: FOUNDATION OF WEALTH**

- **Perhaps you have the knowledge, but no firm ground to build upon.**

If you understand the concept of Wealth Building but find yourself standing still instead of moving further ahead, then you should move right to Step Two, **One-on-One Coaching**.

You know what you want to achieve, but can't see your way clear past the amount of debt that you are carrying and don't foresee when you will be clear of it. Or, perhaps you are trying to grow financially and psychologically but can't seem to make that difficult transition from where you are now to the next level ahead.

Being stuck on a plateau can be debilitating to your overall success, because it saps you of your perseverance. This is exactly where coaching can help to get you over this very real hurdle, and put you on a level playing field alongside your dreams.

## **Step Three: ACCELERATION OF WEALTH**

- **You are playing a tactical game, not a mental one.**

If you have accomplished everything you want to accomplish in your business or career, and feel that there is still something out there that you can take advantage of to move up yet another level, then you need to take a close look at Step Three – (X).
